ACKNOWLEDGEMENT

I thank the Lord Almighty, who blessed me with wonderful faculties, friends and family members whose love and encouragement have given new significance to my accomplishment.

I express my sincere thanks with love to my parents, who are ardent cheer leader and support throughout the project. Their dedication, help me in many ways to achieve the final outcome.

I extend my sincere thanks to my respected Principal **Dr. J. BARNABAS JACOB, M.A., B.Ed., M.Phil., Ph.D.** who always cared to fulfil the needs of the students and had been a moral support to me throughout the year.

I whole-heartedly thank my beloved madam, **Mrs. R. VENISHIA LEENA MARY, M.Sc., M. Phil., MTech., SET.,** The Head of the Department of Computer Science for providing me with constructive criticism and suggestions to fulfil my project.

I extend my thanks to **Mrs. J. NANCY ANNAJOTHI, MCA., M.Phil.** Assistant Professor, Department of Computer Science for her valuable guidance

I would like to take this opportunity to express my sincere gratitude to our Staff members for their outstanding support, guidance, and dedication.

ABSTRACT

This abstract presents the design, development, and implementation of a **Student Progression Management System**, a web-based application developed to track and maintain the career progression of students after graduation. The traditional method of collecting student progression data is often manual, unorganized, and difficult to update regularly. This system provides a centralized and efficient digital platform to manage and monitor student records effectively.

A key aspect of the system is its ability to maintain a structured record of student information, enabling institutions to have a clear view of student progression. It helps in organizing large amounts of data efficiently and improves accessibility of information whenever required.

The system is developed using **HTML, CSS, JavaScript, PHP, and MySQL**, ensuring a responsive, secure, and user-friendly experience. All previous records are maintained in a history section with date and time, enabling easy tracking of career growth over time. Overall, this application helps institutions efficiently manage alumni data and analyze student career progression in a structured manner.
